PROFESSIONAL SUMMARY

I have over 20 years experience in technology and business, specialising in building solutions for e-commerce customers. I build with an emphasis on PHP, Laravel, Node and Vue.js or Reactjs. I engineer scalable, fast, secure systems with stability supported by a robust monitoring stack.

Recently I have been focusing on delivering DevOps projects using Kubernetes containerisation, streamlined deployment workflows, and infrastructure automation with Terraform, Packer and Ansible. My expertise spans cloud platforms such as AWS, OVH and DigitalOcean.

TECHNICAL SKILLS

- Frameworks: Laravel, Shopify, Magento, Vue.js, React.js
- Languages & Runtimes: PHP, JavaScript, CSS, MySQL, Node
- DevOps & Automation: Kubernetes, Terraform, Ansible, Packer, GitHub Actions
- Monitoring: New Relic, Blackfire.io, ELK stack
- Platforms: DigitalOcean, AWS, OVH, Google Cloud
- Tools: Git, GitHub Actions, HashiCorp, Docker, Rollup, Vite, Grunt, Gulp, Deployer
- Cloud & Infrastructure: Production deployment, Infrastructure as Code

EXPERIENCE

FULL STACK CONTRACTOR

Trading under Orchid (Freelance and Contracts) — (Remote)

Dec 2024 – Present

- Shopify development for an e-commerce store.
- Laravel development and DevOps for a Human Resources SaaS startup

DEVOPS & TECHNICAL LEAD

IT JUNCTION LAB (Contract) — Paris, France (Remote)

Dec 2018 – Dec 2024

- Established the company's first-ever DevOps pipeline, moving from zero version control to fully automated CI/CD pipelines using GitHub Actions and Kubernetes.

- Containerised applications with Docker, driving consistency across environments and reducing deployment issues.
- Leveraged Terraform, Packer and Ansible for Infrastructure as Code, accelerating deployment times and improving system reliability.
- Implemented monitoring solutions with New Relic, Blackfire.io and the ELK stack, ensuring 24/7 system uptime and rapid issue detection.

CHIEF TECHNOLOGY OFFICER

MowDirect (Partner) — Norwich, UK

Apr 2010 – Nov 2018

- Modernised the technology stack, transitioning from an outdated Perl-based shopping cart to Magento 1 and later Magento 2, enhancing scalability and improving customer experience.
- Spearheaded the digital transformation by introducing Git-based version control and containerised deployment, removing legacy procedures.
- Developed and led the creation of the company's first automated deployment pipeline, improving release frequency and stability.
- Worked with NetSuite and Salesforce partners to implement their systems into our workflows.

CHIEF WEB & GRAPHIC DESIGNER

Orchid Graphic Design Ltd (Director) — Hertfordshire, UK

Apr 1999 – March 2010

Co-owned and operated a web development company, pioneering early web technologies and delivering websites across various industries including publishing, retail and organisations including the TUC and the Catholic Church.

SENIOR GRAPHIC & WEB DESIGNER

McQuillan Young Communications (Employee) — Piccadilly, London, UK

1998 – 1999

Developed websites and internal communication materials for major clients including BP and the British Council.

EDUCATION

Kent Institute of Art & Design

Bachelor of Arts (Hons) Communication Media (2:1)

PUBLIC PROJECTS

Most of the projects I work on are in private repositories. However, the following are publicly available:

- **Beatify:** tool for creating heartbeats in crontabs via BetterUptime API (<https://github.com/IT-JUNCTION/beatify>)
- **Blackfire Labeler:** utility for labelling Blackfire.io transactions and managing associated data in Redis (<https://github.com/IT-JUNCTION/blackfire-labeler>)
